

GA200CN Propeller

Number of Blades: 2

Diameter: 72"

Blade color: Satin Black w/ White tips

Pitch adjustment range: Infinite

The blades are infinitely adjustable and come with a pitch change tool that is designed to be used with your angle finder to set the blade pitch precisely for your engine RPM. The average pitch change takes about 5 minutes.

Blade Design: The Whirl Wind GA200CN blades are based on the composite blades flying in the proven Whirl Wind 200RV constant speed propeller.

Blade Construction: Whirl Wind's GA200CN blades are constructed from aerospace thermo set composite materials, and are equipped with a full length electro-formed Nickel leading edge shield for unparalleled durability and precise fit. These GA200CN blades are light and durable, and are suitable for flying in rain and from unimproved airstrips.

Hub Construction: Whirl Wind's GA hubs are machined from aerospace grade aluminum. Each hub is shot peened and anodized for increased fatigue resistance.

Spinner: The optional spinner for the GA200CN propeller is an all composite spinner assembly which includes the spinner dome with front & rear bulkheads. The 11.3" spinner complete kit, ships ready for paint with all nutplates installed, no trimming required.

Retail Pricing:

GA200CN Propeller: \$2,500 USD

Optional Composite 11.3" Spinner: \$335 USD

Lead-time: 1 Week
